Seattle, WA

## EDUCATION

**B.S. Computer Engineering**  
University of Washington  
2010 – 2014

## CERTIFICATIONS

- AWS Solutions Architect – Professional
- Google Cloud Professional Data Engineer
- Certified Kubernetes Administrator (CKA)

## SKILLS

### Frontend

React, Redux, TypeScript, Gatsby, Storybook, Sass, Framer Motion

### Backend

Go, Node.js, Python, gRPC, GraphQL, Kafka, RabbitMQ

### Databases

Aurora PostgreSQL, DynamoDB, Cassandra, ElastiCache, BigQuery

### Cloud

AWS (ECS, Lambda, CloudFront, RDS, CDK), Terraform, ArgoCD

### Leadership

Architecture design, Cross-team alignment, Agile, OKR planning, Mentorship

## PROFESSIONAL SUMMARY

Lead Full Stack Developer with 10 years of experience in e-commerce and fintech domains. Expert in designing high-availability event-driven systems and leading distributed engineering teams across time zones. Strong background in performance optimisation, API design, and cloud cost management.

## EXPERIENCE

### Lead Full Stack Developer

Mar 2019 – Present

Amazon, Seattle, WA

- Led team of 10 engineers building seller analytics platform generating \$5M in annual revenue
- Designed event-driven microservices architecture using AWS SQS/SNS processing 50M+ events per day
- Architected multi-tenant SaaS platform with React frontend and Go/Node.js backend
- Reduced AWS infrastructure costs by 30% through serverless migration and compute rightsizing
- Established quarterly architecture review process improving system reliability from 99.5% to 99.95%

### Full Stack Engineer

Jan 2016 – Feb 2019

Expedia, Seattle, WA

- Built dynamic pricing engine and UI for hotel booking system serving 2M+ daily visitors
- Developed mobile-responsive React frontend scoring 98+ on Lighthouse performance audit
- Implemented GraphQL API gateway consolidating 8 legacy REST services into a single endpoint
- Introduced feature-flag infrastructure enabling safe incremental rollouts to 100M+ users

### Web Developer

Jun 2014 – Dec 2015

Tableau, Seattle, WA

- Developed interactive data visualisation web components using React and SVG canvas rendering
- Improved dashboard rendering speed by 3× through virtual DOM diffing optimisations

## KEY PROJECTS

**Seller Analytics Platform** — End-to-end analytics SaaS for Amazon Marketplace sellers; \$5M ARR, 50M events/day

**GraphQL Gateway** — Unified 8 disparate REST APIs into a single typed GraphQL layer, reducing client complexity by 70%
