

James Wilson

Full Stack Engineer – Remote

james.wilson@email.com | (929) 555-0554 | jameswilson.dev | github.com/jwilson | New York, NY

PROFESSIONAL SUMMARY

Remote-first Full Stack Engineer with 7 years building SaaS products and developer tools. Passionate about open-source contributions, developer experience, and shipping clean, well-tested, maintainable code. Track record of contributing to widely-used open-source projects and building platforms used by millions of developers globally.

EXPERIENCE

Senior Full Stack Engineer

Feb 2022 – Present

[Vercel](#), [Remote](#)

- Built core deployment platform features used by 1M+ developers globally across 500M+ deployments/month
- Developed serverless edge-function framework reducing cold-start times by 70% and p99 latency by 40%
- Contributed to open-source Next.js with 5 accepted PRs, 500+ GitHub stars, and 3 feature proposals
- Designed API rate-limiting and abuse-prevention system handling 10B+ requests per month
- Onboarded and mentored 3 new engineers, delivering comprehensive internal documentation and runbooks

Full Stack Engineer

Apr 2019 – Jan 2022

[GitHub](#), [Remote](#)

- Built GitHub Actions workflow editor with complex drag-and-drop YAML graph interactions
- Developed Ruby on Rails backend services supporting 80M+ developer repositories
- Improved accessibility of 15 core UI components achieving full WCAG 2.1 AA compliance
- Reduced API response times by 30% through query caching and N+1 query elimination

Frontend Developer

Jun 2017 – Mar 2019

[Etsy](#), [New York, NY](#)

- Built A/B-tested product listing features contributing to 12% conversion rate improvement
- Implemented progressive web app (PWA) features improving mobile user retention by 18%

KEY PROJECTS

Edge Runtime — Co-built Vercel's edge runtime serving 10B+ req/month at <50ms global latency

Developer CLI — Open-source CLI tool with 12k weekly npm downloads for local Vercel development

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, Remix, Svelte, TailwindCSS, Web Performance
Backend	Node.js, Ruby on Rails, Go, tRPC, REST, GraphQL, Edge Functions
