## Application Security Engineer

sarah.nguyen@email.com | (415) 555-0837 | linkedin.com/in/sarahnguyen-appsec | San Francisco, CA

### PROFESSIONAL SUMMARY

Application Security Engineer with 7 years embedding security throughout the software development lifecycle. Skilled in secure code review, threat modelling, bug bounty programme management, and cultivating security champions in large engineering organisations. Managed programmes that identified 600+ vulnerabilities across 70+ product teams.

### EXPERIENCE

#### Application Security Engineer

Salesforce, San Francisco, CA

Nov 2020 – Present

- Built and scaled AppSec programme covering 3,000+ engineers across 50+ product teams
- Performed 300+ secure code reviews identifying 200+ critical vulnerabilities before production deployment
- Designed threat modelling framework now adopted as the company-wide security design standard
- Managed HackerOne bug bounty programme triaging 500+ external researcher submissions with \$200K+ paid out
- Delivered quarterly security training to engineering teams achieving 95% completion and 4.8/5 satisfaction

#### Product Security Engineer

Twitter (X), San Francisco, CA

Jun 2017 – Oct 2020

- Conducted 40+ penetration tests on web, mobile, and API surfaces across core product lines
- Developed internal security training curriculum achieving 95% annual completion rate
- Remediated OWASP Top 10 vulnerabilities across 20+ production applications
- Triaged and coordinated remediation for 150+ external security researcher bug reports

### TECHNICAL SKILLS

|                     |                                                                                   |
|---------------------|-----------------------------------------------------------------------------------|
| <b>AppSec</b>       | Threat modelling (STRIDE/PASTA), Secure code review, SAST, DAST, Fuzzing, SCA     |
| <b>Tools</b>        | Burp Suite Pro, OWASP ZAP, Semgrep, CodeQL, Veracode, Checkmarx, HackerOne        |
| <b>Vuln Classes</b> | OWASP Top 10, SSRF, XXE, IDOR, SQL injection, XSS, CSRF, Insecure Deserialisation |
| <b>Languages</b>    | Python, JavaScript, Java, Bash, Ruby                                              |

### EDUCATION

#### M.S. Computer Science – Security Track

Stanford University

2015 – 2017

#### B.S. Computer Science

UC San Diego

2011 – 2015

### CERTIFICATIONS

- GIAC Web Application Penetration Tester (GWEB)
- GPEN
- OSCP
- CEH
- ISO 27001 Lead Auditor
