PROFESSIONAL SUMMARY

Incident Response and Digital Forensics Specialist with 8 years containing breaches, analysing threat-actor TTPs, and restoring business operations across finance, healthcare, and critical infrastructure sectors. Experienced in managing high-pressure IR engagements from initial triage through executive reporting and post-incident hardening.

EXPERIENCE

Senior IR & Forensics Analyst

Apr 2019 – Present

[IBM Security X-Force, Atlanta, GA](#)

- Managed 30+ major IR engagements annually including ransomware, BEC, and nation-state intrusions
- Performed memory forensics and disk imaging analysis to reconstruct complete attacker timelines
- Developed threat intelligence reports on 5 emerging threat actor groups distributed to 100+ clients
- Led tabletop and red/blue team exercises for C-suite and security teams at Fortune 500 organisations
- Built automated IOC collection pipeline reducing forensic evidence processing time by 60%

Digital Forensics Analyst

May 2016 – Mar 2019

[Deloitte Cyber, Atlanta, GA](#)

- Collected and preserved digital evidence following strict chain-of-custody procedures for litigation
- Analysed network pcap data and endpoint telemetry to identify and document lateral movement patterns
- Supported e-discovery for 5 major corporate litigation cases involving 10TB+ of structured data
- Delivered forensic findings reports to legal teams and testifying experts in 2 federal court cases
