GitHub, Linear, Figma, Notion, DataDog, PostHog

PROFESSIONAL SUMMARY

Growth-focused Product Engineer with 6 years driving user acquisition, activation, and retention through technical innovation. Expert in building viral loops, referral systems, onboarding optimisation, and high-cadence A/B experimentation. Consistently shipped features with measurable double-digit growth impact.

EXPERIENCE

Product Engineer, Growth

Feb 2022 – Present

[Notion](#), [San Francisco](#), [CA](#)

- Built referral and virality features that contributed to a 35% increase in new user signups quarter-on-quarter
- Optimised onboarding flow through 20+ A/B tests, improving 7-day activation rate by 22%
- Developed automated email personalisation system sending 5M+ targeted messages weekly at 42% open rate
- Reduced sign-up friction by building one-click social auth integration cutting drop-off by 18%
- Introduced product-led growth telemetry enabling real-time funnel monitoring for 8 team members

Software Engineer, Growth

Mar 2019 – Jan 2022

[Lyft](#), [San Francisco](#), [CA](#)

- Engineered dynamic pricing display features improving ride booking conversion rates by 15%
- Built driver incentive programme UI resulting in 20% increase in driver supply during peak demand
- Implemented deep-linking infrastructure for cross-channel paid growth campaigns
- Developed friend referral feature that generated 50,000+ new rider activations in launch quarter

KEY PROJECTS

Referral Engine v2 — Rebuilt referral system with dynamic reward tiers; drove 35% signup growth in 90 days

Growth Telemetry Dashboard — Real-time Looker dashboard tracking 15 funnel KPIs; adopted by 8 growth squads
