

# Layla Hassan

## Product Engineer – AI/ML Features

layla.hassan@email.com | (650) 555-1607 | laylahassan.ai | linkedin.com/in/laylahassan | Palo Alto, CA

### PROFESSIONAL SUMMARY

Product Engineer at the intersection of AI/ML and user experience with 6 years integrating machine learning models into consumer-facing products at scale. Skilled at translating complex ML capabilities into intuitive features, optimising model serving infrastructure, and driving measurable engagement improvements through intelligent personalisation.

### EXPERIENCE

#### Product Engineer, AI Features

Apr 2021 – Present

Google, Mountain View, CA

- Built AI-powered Smart Compose and Smart Reply for Gmail serving 1.8B+ users globally
- Developed ML inference serving infrastructure handling 100K+ model predictions per second at p99 <20ms
- Reduced model inference latency by 50% through quantisation, request batching, and Redis caching
- Collaborated with ML Research to productionise 4 experimental models as shipping product features
- Designed ML explainability UI helping users understand and trust AI-generated suggestions

#### Software Engineer, ML Platform

Jun 2018 – Mar 2021

LinkedIn, Sunnyvale, CA

- Built job recommendation UI integrating ML ranking models improving user engagement by 25%
- Developed A/B testing framework for side-by-side evaluation of ML model variants in live traffic
- Implemented online feature store reducing model training data staleness from 24h to 15 minutes
- Delivered 'Why this job?' explainability feature increasing recommendation click-through by 18%

### KEY PROJECTS

**Smart Compose at Scale** — Extended Smart Compose to 12 languages; serving 1.8B users at <20ms p99 latency

**Feature Store Migration** — Migrated LinkedIn features to online store; 24h → 15min freshness, 18% CTR uplift

### TECHNICAL SKILLS

|                |                                                                                    |
|----------------|------------------------------------------------------------------------------------|
| AI/ML Infra    | TensorFlow Serving, TFX, ONNX Runtime, MLflow, Vertex AI, Feature stores           |
| Frontend       | React, TypeScript, Python (Flask/FastAPI for ML microservices)                     |
| ML Concepts    | NLP, Recommendation systems, Supervised learning, Model evaluation, Explainability |
| Infrastructure | GCP (Vertex AI, BigQuery, GKE, Cloud Run), Docker, Kubernetes, Pub/Sub             |
| Languages      | Python, TypeScript, Go, SQL, Scala                                                 |

### EDUCATION

#### M.S. Computer Science – AI Track

Stanford University

2016 – 2018

#### B.S. Mathematics & Computer Science

UCLA

2012 – 2016

### CERTIFICATIONS

- Google Cloud Professional ML Engineer
- TensorFlow Developer Certificate
- Deep Learning Specialisation – Coursera/DeepLearning.AI
