

Daniel Park

Site Reliability Engineer

daniel.park@email.com | (408) 555-1934 | github.com/danielpark-sre | linkedin.com/in/danielpark | San Jose, CA

PROFESSIONAL SUMMARY

Site Reliability Engineer with 7 years ensuring reliability, scalability, and performance of large-scale distributed systems at hyperscale internet companies. Expert in observability engineering, error budget management, and systematically eliminating toil through infrastructure automation. Led SRE practices across multiple platform teams.

EXPERIENCE

Senior Site Reliability Engineer

Jul 2020 – Present

[Google](#), Sunnyvale, CA

- Maintained 99.999% availability SLA for Google Cloud Storage serving exabytes of data globally across 6 regions
- Reduced on-call alert volume by 65% through alert correlation, runbook automation, and proactive capacity planning
- Built distributed tracing system using OpenTelemetry reducing mean time to diagnosis from 45 to 8 minutes
- Led blameless postmortem culture initiative across 8 SRE teams improving learning velocity from incidents
- Automated weekly toil tasks saving 12 engineering hours per week per team across 4 platform SRE teams

Site Reliability Engineer

Aug 2017 – Jun 2020

[LinkedIn](#), Sunnyvale, CA

- Owned SLOs, SLIs, and error budgets for search and feed platform serving 700M+ members
- Developed 6-month capacity forecasting models using ML regression, reducing over-provisioning by 25%
- Automated failover runbooks for 10 critical services, reducing average recovery time from 20 to 2 minutes
- Designed and ran monthly GameDay chaos exercises across 6 product teams

KEY PROJECTS

Distributed Tracing Platform — Built OTel-based tracing system for GCS; cut MTTD from 45 to 8 minutes

Toil Automation Bot — Python bot auto-resolving 65% of on-call alerts; saved 48+ eng-hours/week across teams

TECHNICAL SKILLS

Reliability	SLO/SLI/Error budgets, Chaos engineering (LitmusChaos), Capacity planning, Incident command
Observability	Prometheus, Grafana, Jaeger, OpenTelemetry, ELK Stack, DataDog, PagerDuty
Infrastructure	GCP (GKE, Spanner, Bigtable, Pub/Sub, Cloud Run), Kubernetes, Terraform, Istio
Languages	Python, Go, Bash, SQL, PromQL, HCL

EDUCATION

M.S. Computer Science

[UC Santa Cruz](#)

2015 – 2017

B.S. Computer Engineering

[UC Davis](#)

2011 – 2015

CERTIFICATIONS

- Google Cloud Professional Cloud Architect
- Google Cloud Professional DevOps Engineer
- Certified Kubernetes Administrator (CKA)
- Certified Kubernetes Application Developer (CKAD)
