PROFESSIONAL SUMMARY

Cloud DevOps Engineer with 5 years building CI/CD platforms, cloud-native applications, and developer self-service tooling at scale. Passionate about platform engineering, GitOps, and making infrastructure invisible to application teams. Reduced deployment cycle times by 80% and enabled 3,000+ engineers to ship independently.

EXPERIENCE

Cloud DevOps Engineer

Jun 2021 – Present

Wayfair, Boston, MA

- Built Internal Developer Platform (IDP) used by 3,000+ engineers for self-service cloud provisioning
- Designed GitOps deployment pipeline using ArgoCD and GitHub Actions deploying 500+ microservices
- Reduced mean deployment time from 45 minutes to under 8 minutes through pipeline parallelisation
- Implemented container security scanning with Trivy preventing 150+ critical vulnerabilities from reaching production
- Introduced shift-left cost visibility tools giving teams real-time per-service cloud spend dashboards

DevOps Engineer

Aug 2019 – May 2021

Wayfair, Boston, MA

- Managed Kubernetes clusters across 3 AWS regions supporting 10,000+ daily deployments
- Built centralised log aggregation pipeline (Fluentd/Elasticsearch/Kibana) processing 5TB of logs per day
- Automated monthly GameDay chaos exercises testing resilience of 30+ critical services
- Reduced Kubernetes cluster cost by 25% through Karpenter spot-instance scheduling and bin packing

KEY PROJECTS

Internal Developer Platform — Backstage-based IDP enabling 3,000+ engineers to provision infra in <5 minutes

GitOps Pipeline — ArgoCD + GitHub Actions pipeline for 500+ services; 45min → 8min deployments
